Some projects

Легенди старого Львова

It was a team project for competition. We used Unity and 3DMax for creating interesting guest-game. All code written on C# and you can run this game on Linux, Windows or Mac systems.

Clickers

It was also a team project to smartphones, which we developed for NULP-contest. It provided better interactivity during classes. We used Xamarin, because of the need to develop app for all mobile platforms.
